

Best Eyeliner Styles to Make Your Eyes Look Bigger

If you've ever wished for bigger, more open eyes, the good news is that makeup can help create the illusion of larger eyes. Eyeliner, in particular, is one of the most effective tools for this. From soft and subtle looks to bold and dramatic styles, the right eyeliner application can enhance the size and shape of your eyes. Here's a guide to the best eyeliner styles that can make your eyes appear bigger and more awake.

1. The Winged Liner: Elevate Your Look

The winged eyeliner style is a classic that's beloved for a reason—it lifts the eyes, giving them an almond shape that looks larger and more defined. By extending the liner beyond the outer corner of the eye, you not only create a bold statement but also open up the eye area, making it appear bigger. [Which Eyeliner Style Makes Eyes Appear Bigger?](#) The winged eyeliner is a perfect answer, enhancing the eyes and giving them a more dramatic, wide-eyed effect.

How to achieve the look:

- Start by applying eyeliner along the upper lash line.
- When you reach the outer corner, flick the eyeliner upward to create a wing.
- Keep the liner thin near the inner corner and thicker as you move outwards for a dramatic effect.

2. The Tightline Technique: Subtle but Effective

If you prefer a more natural look but still want to make your eyes appear larger, tightlining is the perfect technique. This involves lining the upper waterline (the area between your lashes and the eye), which makes your lash line appear fuller and your eyes more defined without being overly noticeable.

How to achieve the look:

- Gently lift your eyelid and carefully apply eyeliner to the waterline.
- Choose a pencil eyeliner or gel liner for a smooth, precise application.

3. Smudged Lower Lash Line: A Soft, Wide-Eyed Look

A smudged eyeliner look on the lower lash line can create the illusion of bigger eyes by adding definition and dimension to the eye area. It's softer than a harsh line but still makes a noticeable difference in how open and awake your eyes appear.

How to achieve the look:

- Apply a thin line of eyeliner along the lower lash line.
- Use a brush or your finger to gently smudge the liner for a softer, more diffused effect.
- Make sure the smudged liner is thicker toward the outer corners to elongate the eyes.

4. Nude or White Waterline: Brighten Your Eyes

One of the simplest ways to make your eyes appear bigger is by applying a nude or white eyeliner to your lower waterline. This instantly brightens the eyes and creates the illusion of more white space, making your eyes look wider and more awake.

How to achieve the look:

- Choose a nude or white pencil eyeliner.
- Carefully apply it to the lower waterline, avoiding the upper waterline to keep the look natural.
- Pair with a subtle mascara to complete the bright-eyed effect.

5. The Cat Eye: Bold and Dramatic

For a bold, more dramatic approach, the cat eye eyeliner style is a perfect choice. The extended flick of the eyeliner at the outer corners pulls the eyes upward and outward, giving the illusion of larger, lifted eyes. It's a timeless look that never goes out of style and works well for both day and night looks.

How to achieve the look:

- Apply eyeliner to the upper lash line and gradually thicken it as you move outward.
- Create a sharp wing at the outer corner, extending the line toward the tail of your eyebrow.

- For a more dramatic look, you can add more thickness to the line near the lash line and extend the flick even further.

6. Double Liner: Add Depth and Drama

For those who want to make their eyes stand out even more, the double liner technique can add both depth and dimension. By applying one line of eyeliner along the upper lash line and another line below the lower lash line, you create a bold, striking look that opens up the eyes and makes them appear larger.

How to achieve the look:

- Start by applying a thin line of eyeliner along your upper lash line.
- Then, apply a second line along the lower lash line, keeping it thin and close to the lash line.
- You can opt for different colors, like a bold black on top and a soft brown or colored liner on the bottom for a fun contrast.

7. Eyeliner and Mascara Combo: Bigger Eyes in Minutes

Pairing eyeliner with mascara is one of the quickest and most effective ways to make your eyes look bigger. While the eyeliner defines the eyes, mascara helps lift and volumize the lashes, adding even more to the illusion of bigger eyes.

How to achieve the look:

- Apply eyeliner to your upper lash line, creating a thin to medium line depending on the style.
- Finish with a generous coat of mascara, focusing on the outer lashes to open up the eyes.

Conclusion

There are several eyeliner styles that can make your eyes appear bigger, from the subtle tightlining to the bold cat eye. Each style enhances the eyes in a unique way, giving you the flexibility to choose the one that best suits your look and personality. Experiment with different techniques and find the eyeliner style that works best for you. With the right technique, you'll have eyes that appear larger, brighter, and more captivating in no time!
